

Obire Israel

Backend Engineer & Full-Stack Developer

+234 708 147 2383 | obireoviemenaisrael@gmail.com | linkedin.com/in/israelo-8b05113b1 | ashura.site | Lagos, Nigeria

PROFESSIONAL SUMMARY

Detail-oriented Backend and Full-Stack Developer with foundational expertise in frontend workflows and active immersion in enterprise-level backend software engineering at FlexiSAF. Skilled in optimizing web architecture, designing clean APIs, and managing relational databases. Proven capability in translating technical specifications into functional implementations, with a primary focus on code performance, scalability, and clean data modeling.

TECHNICAL SKILLS

Programming Languages:	JavaScript (ES6+), SQL (PostgreSQL/MySQL), Python
Frameworks & Libraries:	React.js, Node.js, Express, Next.js, Tailwind CSS, Bootstrap
Backend & Infrastructure:	RESTful API Design, Relational Data Modeling, Git Version Control, Postman
Core Web Concepts:	Responsive Web Design, Web Performance Optimisation, Cross-Browser Compatibility

PROFESSIONAL EXPERIENCE

FlexiSAF Edusoft Limited <i>Backend Engineering Intern (Remote / Hybrid)</i>	2026 – Present
- Immersed in developing and scaling production-level backend logic for large-scale enterprise EdTech applications. - Collaborate with senior team tracks to map database schemas, maintain data integrity, and build optimized backend queries. - Implement and audit backend endpoints to guarantee high performance, security, and clean API integration workflows.	
Freelance Software Developer <i>Self-Employed · Remote</i>	2020 – 2026
- Architected full frontend lifecycles from initial visual prototypes to clean production code deployment for small business clients globally. - Engineered structured, responsive web apps using modern JavaScript frameworks, reducing asset load latencies via targeted performance optimization. - Streamlined project continuous deliveries using clean Git repository version controls, maintaining codebase modularity and reducing revision loops.	

EDUCATION

Federal University of Petroleum Resources — Delta State, Nigeria Bachelor of Engineering · Electrical and Electronics Engineering	Expected 2026
---	---------------

SELECTED ENTERPRISE & FULL-STACK PROJECTS

E-Commerce Core Application Architecture	ashura.site/preview/bags.html
---	---

- Engineered responsive UI states integrated with localized client-side browser caching, ensuring data persistency across user sessions.
- Implemented efficient image optimization asset loading pipelines, speeding up client navigation metrics.

Dynamic Platform Data Rendering Engine

ashura.site/preview/gadgets.html

- Developed scalable component grid layout architectures optimized for fast rendering cycles and cross-browser consistency.
